

Introduction

Theoretical Framework

Methodology

Results

Discussion

Validity Threats

Conclusion and Future Work

- Background
- Statement of the problem
- Purpose
- Research questions
- Significant of the study
- Outline of the report

- Architectures in automotive domain
- Software visualization
- Low- and high-level electrical architectures at VCG
- Elektra software and its usage
- Model-Driven Software Engineering
- Graphical notation of the generated text
- Stakeholders

- Phase I
- Phase II

- Visualization from phase I
- Visualization from phase II
- Evaluation of the visualization

- Answers to the research questions

- Conclusion validity
- Internal validity
- construct validity
- external validity
